

fully inflatable...
easy to install...
attachable to any Jet Ski

Jet Ski or dinghy? BOTH! Have the ultimate fun on your Jet Ski with space for 6 more people! This innovative Jet Ski extension is the biggest party on the water!

JETXTENDER is an indispensable accessory for your Jet Ski. It looks and feels like a regular inflatable boat, but attaching it to a Jet Ski means no more outboard motor! Jet Ski owners love speed and manoeuvrability, but miss the room to take more passengers along. The JETXTENDER offers them the best of both worlds.

JETXTENDER is light (starting at about 30 kg) and packs up so small that you can carry it on your Jet Ski. It inflates in just moments and is easy to attach. You can ride it with agility through very shallow waters. JETXTENDER also works great at both - high and low speeds, making it unrivalled in both - recreational or rescue applications.

We tested it: Using a BRP Spark TRIXX with 90hp, the JETXTENDER has performed great at 20 knots with 1+4 people, and with 2+8 people at 15 knots.

You can use it with any other Jet Ski, too, for extra space, buoyancy, stability, safety and visibility.

YOU WILL LOVE THIS GADGET!

JetXtender ... Extend your JetSki

European Production – create your own design

CREATE YOUR INDIVIDUAL DESIGN

Due to the production in Europe, the JETXTENDER becomes your unique specimen. You choose your own colors and logos to match your Jet Ski or yacht.

Individual appearance for rescue, fire and military.

For watersport stations, JETXTENDER offers perfect transport options. With striking design and concise advertising message, your station becomes an eye catcher.
